PROJECTS

Project Title : Employee Database Management System (Angular).

Team Size : 3

Role : Team Leader

Project Description:

Employee Database Management System:

“In any organisation such as schools, colleges, companies, industry, etc certain number of employee’s are employed. Managing this type information by just simply noting them in a diary is a tedious task to do. So in order to manage employee’s details some automation is required. Employee Management which includes automated management of an employee’s payroll activities by reducing large amount of paper work. This system brings about an easy way of maintaining the details of employees working in any organization. This software is built using ANGULAR, HTML, CSS, JavaScript, NODEJS, EXPRESSJS and MONGODB for database. The project describes how to manage user data for good performance and provide better services for the client.
